LinkedIn: **Julian HT** | Github: **JulianTymeczko** | Portfolio: **My Portfolio**

Results-driven front end and full stack web developer with a focus on enhancing user experiences. Recently received a certificate from the Carleton University Fullstack Web Development Bootcamp. Self-motivated problem solver and collaborative team player.

Technical Skills

Languages/Libraries/Frameworks: HTML5, CSS3, SASS, JavaScript ES6+, React, Jest, JQuery, Bootstrap, Node.js, Express.js, MySQL

Developer Tools: Git, JIRA, Agile Development, Figma, npm, Vite, Heroku

Portfolio Samples

WebDev Jobs App   Live Link: **Dev Jobs Web App**

- Tools: HTML5, CSS3, JavaScript ES6+, React, Git
- Crafted a dynamic Dev Jobs Web App using React to display job listings and their job descriptions from JSON data using filtering and searching capabilities. Users can enjoy both light and dark modes in this responsive application, meticulously designed from Figma mockups.

Arch Studio Website   Live Link: **Arch Studio Website**

- Tools: HTML5, CSS3, JavaScript ES6+, LeafletJs, Git
- Transformed Figma designs into a pixel-perfect multi-page website, ensuring seamless responsiveness across all screen sizes. A visually stunning and user-friendly digital experience that spans four pages.

URL Shortener   Live Link: **URL Shortener**

- Tools: HTML5, CSS3, JavaScript ES 6+, Server-side API, Git
- Created a URL Shortener from scratch, allowing users to shorten valid URLs and providing error handling, all in a responsive design.

Education

Carleton University Full Stack Web Development Certificate   **Oct. 2023**

- Gained experience using web development technologies and actively engaged in collaborative team projects, within the high-paced agile development environment. Successfully completing assignments aligned with the latest technologies taught.
